

## CEMA B Idlers - 2400 Series

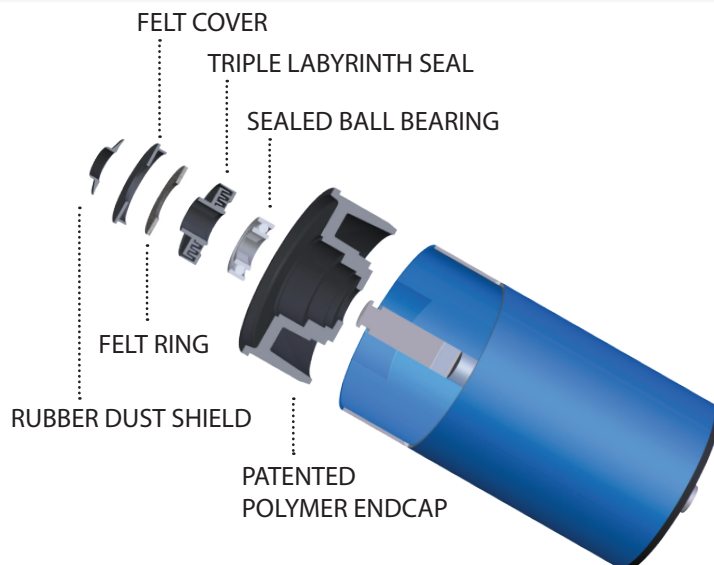

**Unmatched Strength and Sealing Performance:** Luff Industries' patented polymer endcap design delivers exceptional strength, durability, and sealing performance, keeping contaminants out and your operation running smooth.

**Corrosion Resistant Shell Protection:** Each roller shell is fully dipped before assembly, offering long-term protection against internal corrosion.

**Built to CEMA Standards:** All assemblies meet CEMA standard dimensions for easy integration, available in 4" and 5" diameters

**Precision you Can Depend On:** Very low Total Indicator Runout (TIR) ensures smooth, efficient operation with minimal belt vibration or tracking issues.

**Engineered for Heavy-Duty Performance:** Equipped with a 20mm shaft and bearing, exceeding the industry standard of 17mm, for enhanced load capacity and longevity.

**High Moisture Seal Available**

**Conveying Performance**
