

## *Clean Weave Return Roller*

**Ultra-Durable Polyurethane Discs:** Constructed from precision-molded polyurethane with exceptional abrasion resistance, offering up to 5x the wear life compared to conventional steel or rubber return rolls.

**Self-Cleaning Spiral Design:** Spiral surface enables auguring action that cleans the belt's underside with every rotation, preventing material build-up between discs and on the conveyor belt.

**Consistent Contact for Enhanced Cleaning:** The helical disc arrangement ensures each disc contacts the belt surface at varying angles and positions, enhancing the cleaning efficiency.

**Corrosion & Rust Resistant:** Specially formulated polyurethane resists harsh environments for long-lasting reliability.

**Low Maintenance & Long Service Life:** Reduces maintenance intervals and component replacements, delivering lower total cost of ownership for conveyor systems.
